Mechanical–technological values		
Single-end breaking force (tensile force until the thread breaks)	DIN EN ISO 2062	ca. 480 cN
Elongation at break	DIN EN ISO 2062	ca. 9 %
Care instructions		

Other technical information

Due to the fiber composition and the special construction of the

REFLECT thread, the thickness can't be provided in *Nm* and *dtex*.

REFLECT can be embroidered with designs digitalised for 35 or 40-weight threads. Because of the structure of the surface the weight of the thread might vary slightly, therefore the design should be tested in advance.

Certificates

STANDARD 100 by OEKO-TEX®, annex 4, product class I
